SUMMARY

Cum Laude Computer Science graduate with hands-on experience spanning mobile app development, applied machine learning, and administrative/data operations. Has led and independently delivered projects end-to-end, from architecture and build through testing and release. Alongside 10+ months of experience keeping records, inventories, and datasets accurate and audit-ready. Adaptable across technical and operational roles, with a strong record of following through on ownership.

TECHNICAL SKILLS

- **Tech Stack:** JavaScript, TypeScript, Tailwind, React, Framer Motion, Dart/Flutter, SQL, Firebase, REST API, Python
- **Design:** Adobe Photoshop, Adobe Lightroom, Adobe Premiere Pro, Canva
- **Tools:** Microsoft Office Suite, GitHub, VS Code, Discord, Trello
- **Administrative & Data Support:** Data entry & validation, digital inventory management, record digitization, database cleaning, basic troubleshooting

PROFESSIONAL EXPERIENCE

Administrative Support — Ben-Lee Tailoring and Sportswear Nov 2025 – May 2026

- Maintained inventory records across the production floor, helping prevent stock shortages that would otherwise interrupt order fulfillment.
- Digitized player name and size records for 100+ customer orders, replacing manual logbooks and reducing order-entry errors.
- Provided basic IT support for office computers, including hardware troubleshooting, component repairs, and storage upgrades such as installing additional hard drives.

UI/UX Designer & Developer — Mobile App Prototype — TricyFair Feb 2026 – Mar 2026

- Designed and built a responsive Flutter interface for real-time fare estimation and route navigation, aimed at cutting the time riders spend estimating fares before booking.
- Mapped and streamlined the driver-to-passenger user flow from 3 legacy touchpoints down to a single-screen booking interaction.
- Researched and proposed an OpenStreetMap-based routing integration projected to cut map API costs by an estimated 40–60% versus a Google Maps-based approach.

Data Entry Specialist — Remote Jul 2025 – Aug 2025

- Entered, validated, and updated administrative datasets, maintaining accuracy across high-volume record batches.
- Cleaned database records by identifying and correcting syntax inconsistencies and removing duplicate entries, improving overall dataset reliability.
- Reviewed records prior to submission to ensure full compliance with client formatting and quality guidelines.

Mobile App Developer — Educational Game Project — PILlpinas Dec 2024 – Jan 2025

- Conceived, designed, and independently developed PILlpinas, an Android educational game built in Flutter to raise awareness of West Philippine Sea territorial issues.
- Built interactive quizzes and informational modules, optimizing for mobile UI responsiveness and runtime performance.
- Owned the full project lifecycle solo — concept, asset integration, debugging, and final testing — from first commit to release build.

IT Intern (OJT) — University Information Office, University of Northern Philippines Jul 2024 – Aug 2024

- Transcribed and processed office documents, improving records management speed and entry accuracy for the office.
- Programmed a responsive website prototype to modernize the office's digital presence.
- Supported staff with debugging local applications, running network tests, and preparing digital content for online publication.

EDUCATION

Bachelor of Science in Computer Science 2021 – 2025

University of Northern Philippines — Cum Laude

Undergraduate Thesis: OTICURE — A Mobile Application for Accurate and Timely Medication

Led a 3-person team as lead developer to build OTICURE, a Flutter/Firebase app tackling medication non-adherence with a recommendation engine. Delivered an app validated against ISO 25010 standards through continuous testing.
